(NAVY RATINGS 1775-1969)

This listing of enlisted ratings and apprenticeships in the U.S. Navy from 1775 to 1969 has been compiled primarily for use by members of the Permanent Board for Control of the Enlisted Rating Structure which has the responsibility for conducting a continuing study of the enlisted rating structure, and for reviewing and making appropriate recommendations concerning proposals for changes to the structure.

Since the concept of rates, ratings, and other occupational entities to describe naval careers has undergone considerable change during the evolution of the rating structure, the ratings included in this listing are not necessarily comparable. The present philosophy and concept of the enlisted rating structure and its sub-systems, i.e., service ratings, emergency ratings, etc., are described in the Manual of Qualifications for Advancement, NAVPERS 18068B.

While the ratings and historical notes as listed are based on factual data extracted from official publications and other readily available sources, it is recognized that there may be some omissions and discrepancies.
